

DATAVAULT SYSTEMS

Technical Cloud Proposal — Meridian Logistics GmbH

Proposal ID: DVS-2026-MEL-TEC | Prepared: May 2026 | Validity: 60 Days

Executive Summary

DataVault Systems is a specialist enterprise cloud provider with a specific focus on data-intensive workloads, logistics technology, and European regulatory compliance. Headquartered in Munich, DataVault operates 6 German data centres (4 in Frankfurt, 2 in Munich) and holds the distinction of being the first cloud provider in Germany to achieve BSI C5 Type 2 certification for all facilities.

DataVault's proposal for Meridian is strategically the most cost-effective at Year 1: €5.24 million all-inclusive. However, we are transparent that our scale is smaller than some competitors — DataVault serves 820 enterprise clients and our revenue for FY2025 was €380 million. We compensate with unmatched German-specific compliance depth and logistics-sector specialisation.

1. Company Overview

Founded	2011, Munich, Germany
Ownership	Private — majority owned by Allianz Ventures and Bayern Kapital
Revenue FY2025	€380 million (+22% YoY)
EBITDA	€91 million (24% margin)
Data Centres	6 (Frankfurt x4, Munich x2) — all German sovereign territory
Enterprise Clients	820
Logistics Clients	180 (22% of total client base)
Employees	1,800
Carbon Status	100% renewable energy, Carbon Neutral 2022

2. Compliance — German Sovereign Cloud Specialist

DataVault's primary competitive advantage for German enterprises is compliance depth. All 6 data centres are on German sovereign territory, operated exclusively by German employees under German law:

ISO 27001:2022	ACTIVE	February 2027	All 6 facilities
BSI C5 Type 2	ACTIVE	September 2026	All 6 facilities — only provider with full coverage
SOC 2 Type II	ACTIVE	January 2027	FRA-1, FRA-2, MUC-1
TISAX Level 3	ACTIVE	December 2026	MUC-1, MUC-2, FRA-1
ISO 27018	ACTIVE	February 2027	All facilities
GDPR Art. 28 DPA	Enhanced DPA	N/A	German law governed, Frankfurt courts jurisdiction
Schrems II Compliant	VERIFIED	N/A	No US parent company, no Patriot Act exposure
DSGVO Specialist	Verified	N/A	German Data Protection Authority registered

CRITICAL DIFFERENTIATOR: DataVault has NO US parent company and NO exposure to US Patriot Act or CLOUD Act data requests. This is the strongest data sovereignty guarantee available to Meridian for GDPR compliance and is particularly relevant to Meridian's pharmaceutical and financial logistics clients.

3. Logistics Platform Specialisation

DataVault LogiStack is a pre-built cloud architecture pattern developed for logistics companies — Meridian can deploy on proven infrastructure used by 180 logistics operators:

- Pre-built TMS integration connectors: Oracle TM, SAP TM, Transplace, MercuryGate — Meridian uses Oracle TM
- WMS integration: Manhattan Associates pre-configured connector (Meridian current WMS)
- Real-time shipment tracking data platform: 50TB/day ingestion capacity
- EDI B2B platform: 400+ pre-built carrier/partner EDI mappings
- Cold-chain IoT integration: pre-built connectors for Sensitech, Zebra, and Controlant sensors
- Last-mile API hub: pre-built integrations with DHL, UPS, FedEx, DPD, Hermes APIs

4. SAP Infrastructure

DataVault is an SAP Platinum Partner with 95 active SAP deployments across our client base:

- DV-SAP-ULTRA nodes: 128-core, 16TB RAM — purpose-built for S/4HANA, HANA-certified
- Storage: All-NVMe arrays with 0.3ms average latency — exceeds SAP recommended <1ms
- SAP BASIS: fully managed, included in base pricing — no additional cost
- Migration: DataVault SAP Migration Accelerator — completed 31 S/4HANA migrations, average 10 weeks
- SAP S/4HANA 2022: DataVault is a certified reference architecture provider for this exact version

5. Pricing

SAP HANA Infrastructure	1,620,000	1,652,400	1,685,448	1,719,157	1,753,540
Compute	880,000	897,600	915,552	933,863	952,540
Storage (NVMe)	360,000	367,200	374,544	382,035	389,676
Network (zero egress EU)	120,000	122,400	124,848	127,345	129,892
LogiStack Platform	140,000	142,800	145,656	148,569	151,540
SAP BASIS Managed	0	0	0	0	0
Security Suite	80,000	81,600	83,232	84,897	86,595
Support (Premium)	40,000	40,800	41,616	42,448	43,297
TOTAL	5,240,000	5,304,800	5,370,896	5,438,314	5,507,080

DataVault offers the lowest 5-year TCO in this evaluation at €26.86 million. Price escalation 2% per annum. Zero egress fees within EU. SAP BASIS fully included.

6. SLA

Compute (FRA HA)	99.95%	20 minutes	8x credit per hour
SAP HANA	99.95%	20 minutes	8x credit
NVMe Storage	99.999%	30 minutes	5x credit
Network	99.99%	20 minutes	8x credit
LogiStack Platform	99.9%	1 hour	3x credit

7. Limitations — Honest Disclosure

DataVault believes in full transparency. Meridian should consider the following:

- Scale: DataVault is significantly smaller than CloudPrime or NexaCloud. For very large burst workloads (Black Friday logistics peaks), capacity may be constrained — we recommend capacity reservation agreements
- Global reach: DataVault operates in Germany only. For Meridian operations outside EU, a secondary provider may be needed
- Kubernetes: DataVault Kubernetes Service is generation 1 — less mature than competitors. We recommend 6-month parallel run before full migration
- ML platform: DataVault AI offering is limited. GPU clusters available but NexaAI is stronger for advanced ML workloads
- Support: €40,000/year support tier has 20-minute P1 response but team is 12 engineers vs competitors 100+
- Onboarding timeline: 14-16 weeks estimated — 2 weeks longer than CloudPrime due to smaller migration team
