

NEXACLOUD PLATFORM

Enterprise Solution Brief — Meridian Logistics GmbH

Reference: NXC-MEL-2026-Q2 | Confidential | Valid 90 Days from Issue

Executive Overview

NexaCloud Platform is the enterprise cloud subsidiary of NexaTech Group, a NASDAQ-listed technology conglomerate (NXTG) with market capitalisation of \$18.4 billion. NexaCloud operates across 31 global regions with 8 EU-based points of presence including Frankfurt, Amsterdam, and Paris. Total enterprise client base: 8,400 organisations across 60 countries.

For Meridian Logistics, NexaCloud proposes a comprehensive cloud transformation delivering Year 1 total cost of €6.44 million and five-year TCO of €31.2 million. Our AI-first platform architecture will reduce Meridian's operational overhead by an estimated 35% through intelligent automation.

1. Financial and Corporate Standing

Parent Company	NexaTech Group (NASDAQ: NXTG)
Market Cap	\$18.4 billion (May 2026)
NexaCloud Revenue FY2025	\$2.8 billion
YoY Growth	34%
EU Regions	8 (Frankfurt, Amsterdam, Paris, Stockholm, Warsaw, Madrid, Milan, Dublin)
Enterprise Clients	8,400 globally, 2,100 in EU
Employees (Cloud Division)	12,000
Carbon Commitment	Net Zero operations since 2023

2. Compliance Portfolio

ISO 27001:2022	ACTIVE	July 2027	All 8 EU regions
SOC 2 Type II	ACTIVE	March 2027	Frankfurt, Amsterdam, Paris
SOC 3 (Public Report)	ACTIVE	March 2027	All regions
ISO 9001:2015	ACTIVE	December 2026	All regions
PCI DSS Level 1	ACTIVE	October 2026	Frankfurt, Amsterdam
GDPR Article 28 DPA	Standard	N/A	All EU regions
BSI C5	ACTIVE	August 2026	Frankfurt only
ENS Medium	ACTIVE	June 2026	Madrid
FedRAMP Moderate	ACTIVE	N/A	US regions only

Note: TISAX certification is under evaluation — expected Q4 2026. NexaCloud can provide interim TISAX gap analysis and roadmap upon contract signing.

3. Technical Platform

3.1 AI-Native Infrastructure

NexaCloud's differentiating capability is its AI-native infrastructure layer — NexaAI Platform — which provides Meridian with intelligent resource optimisation, predictive scaling, and anomaly detection without additional tooling:

- NexaAI OptiScale: ML-driven auto-scaling reducing compute waste by average 28% across enterprise clients
- NexaAI AnomalyGuard: real-time infrastructure anomaly detection with 99.3% accuracy (vs 94% rule-based systems)
- NexaAI CostIntelligence: natural language cost querying — "show me top 10 cost drivers this month by team"
- NexaAI FinOps: automated reserved instance optimisation — average 22% additional saving vs manual RI management
- GPU cluster management: NVIDIA H100 and A100 pools with dynamic allocation for Meridian ML workloads

3.2 SAP Integration

NexaCloud is an SAP Endorsed App partner. SAP HANA on NexaCloud uses purpose-built NXC-SAP-PRIME instances:

- NXC-SAP-PRIME-192: 192 vCPU, 24TB RAM — exceeds SAP recommended minimum for S/4HANA at Meridian scale
- SAP-certified HANA storage with <1ms latency guarantee
- SAP Solution Manager integration for landscape monitoring
- Pre-built SAP migration runbooks — estimated 14-week migration timeline
- SAP BASIS managed service: €85,000/year (additional, not included in base pricing)

3.3 Container Platform — NexaKube

- Managed Kubernetes 1.28 with automated patch management
- Built-in service mesh (NexaMesh — proprietary, based on Envoy)
- Multi-cloud federation capability for hybrid deployments
- Observability: New Relic integration included (€18,000/year value)
- NexaKube Pro upgrade available for advanced features: €120,000/year additional

4. Pricing

SAP HANA Instances	2,100,000	2,142,000	2,184,840	2,228,537	2,273,108
Compute (Standard)	1,240,000	1,264,800	1,290,096	1,315,898	1,342,216
Storage	380,000	387,600	395,352	403,259	411,324
Network & Egress	280,000	285,600	291,312	297,138	303,081
NexaAI Platform	220,000	224,400	228,888	233,466	238,135
NexaKube (Base)	0	0	0	0	0
SAP BASIS Managed	85,000	85,000	85,000	85,000	85,000
Support (Enterprise)	135,000	137,700	140,454	143,263	146,128
TOTAL	6,440,000	6,527,100	6,615,942	6,706,561	6,798,992

Price escalation: 2% per annum on compute and storage. SAP BASIS fixed. NexaAI Platform pricing fixed for 5-year term.

5. SLA Commitments

Compute (Multi-AZ)	99.95%	30 minutes	5x credit
SAP HANA	99.9%	30 minutes	5x credit
Storage	99.99%	1 hour	3x credit
NexaKube	99.9%	30 minutes	5x credit
NexaAI Platform	99.5%	2 hours	2x credit
Support Ticket Portal	99.5%	4 hours	1x credit

6. Support Tiers

Enterprise Support (included in pricing):

- 24/7 support via phone and ticketing portal
- Named Technical Account Manager (shared — 1 TAM per 3 enterprise clients)
- P1 response: 30 minutes acknowledgement, 4-hour action plan
- P2 response: 4 hours acknowledgement, 12-hour action plan
- Monthly infrastructure health reports
- Quarterly business reviews

Premium Support upgrade available: +€95,000/year includes dedicated TAM and 15-minute P1 response.

7. Customer References

Global Freight Alliance (GFA): 11,000-employee freight forwarder migrated to NexaCloud in 2024. Annual cost saving of €1.8 million vs previous provider. AI-driven demand forecasting reduced empty truck runs by 18%.

Nordic Logistics Partners: Migrated SAP landscape in 16 weeks. NexaAI CostIntelligence identified €340,000 in unnecessary reserved instances within first 30 days of operation.

8. Known Limitations and Mitigations

NexaCloud acknowledges the following items for transparency:

- TISAX certification: not yet achieved. Roadmap: Q4 2026. Interim: NexaCloud will fund external TISAX gap assessment for Meridian at no charge
- SAP BASIS managed service is an additional cost (€85,000/year) not included in base infrastructure pricing
- Dedicated TAM requires Premium Support upgrade — shared TAM included in standard Enterprise tier
- NexaMesh (service mesh) is proprietary — migration to Istio would require effort if Meridian switches providers
- Frankfurt region: single availability zone currently. Second AZ planned Q3 2026
