

SKYBRIDGE CLOUD

Enterprise Cloud Proposal — Meridian Logistics GmbH

Proposal Ref: SBC-2026-MEL-ENT | Date: May 2026 | Confidential

Executive Summary

SkyBridge Cloud is the enterprise division of SkyBridge Technology Group, headquartered in London with European operations based in Amsterdam. SkyBridge Cloud operates 22 global regions with 5 EU data centres. With \$4.1 billion in cloud revenue for FY2025 and 5,600 enterprise clients globally, SkyBridge represents a proven mid-tier alternative to the large hyperscalers.

Our proposal for Meridian delivers Year 1 cost of €6.91 million with a five-year TCO of €33.8 million. SkyBridge's primary differentiator is our hybrid cloud architecture and our SkyBridge Connect platform which provides seamless integration between on-premise SAP and cloud workloads — particularly relevant for Meridian's phased migration approach.

1. Corporate Profile

Parent	SkyBridge Technology Group PLC (LSE: SBTG)
Market Cap	£6.2 billion (May 2026)
Cloud Revenue FY2025	\$4.1 billion (+28% YoY)
EU Data Centres	5 (Amsterdam x2, Frankfurt, Paris, Stockholm)
Enterprise Clients	5,600 globally, 1,800 EU
HQ (Cloud Division)	Amsterdam, Netherlands
Employees	9,200
Carbon Neutral	Since 2025, 100% renewable energy

2. Compliance

ISO 27001:2022	ACTIVE	May 2027	All EU regions
SOC 2 Type II	ACTIVE	February 2027	Amsterdam, Frankfurt
ISO 27018	ACTIVE	May 2027	All EU regions
PCI DSS Level 1	ACTIVE	July 2026	Amsterdam-1
GDPR DPA	Standard	N/A	All EU
BSI C5	IN PROGRESS	Expected Dec 2026	Frankfurt only
TISAX	NOT ACHIEVED	Roadmap: 2027	Not available
ISO 22301 (BCP)	ACTIVE	March 2027	All EU

IMPORTANT: SkyBridge does not currently hold TISAX certification. For Meridian's automotive logistics clients, interim controls documentation can be provided. Full TISAX certification is targeted for Q1 2027.

IMPORTANT: BSI C5 certification for Frankfurt region is in progress — expected December 2026. Current status: Level 1 self-attestation only.

3. Technical Architecture

3.1 SkyBridge Connect — Hybrid Cloud Platform

SkyBridge Connect is our flagship hybrid connectivity solution, enabling seamless workload portability between on-premise and cloud:

- Sub-5ms latency private link from on-premise to SkyBridge Amsterdam or Frankfurt regions
- Transparent workload migration: move SAP application servers between on-premise and cloud without downtime
- Unified management plane: single console for on-premise and cloud resources
- Bandwidth: 1Gbps to 100Gbps private connectivity options
- Cost: SkyBridge Connect included at no charge for Meridian

3.2 SAP on SkyBridge

- SkyBridge is SAP Validated Partner for S/4HANA on IaaS
- SB-SAP-ENTERPRISE nodes: 64-core, 8TB RAM (lower spec than competitors — suitable for Meridian current scale but limited headroom)
- SAP HANA dynamic tiering supported for cost optimisation
- Migration estimated: 18-20 weeks (longer than competitors due to hybrid architecture complexity)
- SAP BASIS: managed service additional €110,000/year

3.3 Container Platform

- SkyKube: managed Kubernetes 1.28
- Multi-cloud capability: SkyKube can federate with Azure AKS or AWS EKS — useful for multi-cloud strategy
- Observability: Datadog integration included (€28,000/year value)
- Service mesh: Linkerd pre-installed

4. Pricing

SAP Infrastructure	2,280,000	2,325,600	2,372,112	2,419,554	2,467,945
Compute	1,480,000	1,509,600	1,539,792	1,570,588	1,602,000
Storage	420,000	428,400	436,968	445,707	454,621
Network & Egress	310,000	316,200	322,524	328,974	335,554
SkyBridge Connect	0	0	0	0	0
SAP BASIS Managed	110,000	110,000	110,000	110,000	110,000
Security Tools	180,000	183,600	187,272	191,017	194,838
Support (Standard 24/7)	130,000	132,600	135,252	137,957	140,716
TOTAL	6,910,000	7,006,000	7,103,920	7,203,797	7,305,674

Note: SkyBridge 5-year TCO of €35.53 million slightly exceeds Meridian budget envelope. 10% volume discount negotiable for 5-year commitment bringing Year 1 to €6.22 million. SAP BASIS managed service is additional and mandatory for SLA compliance.

5. SLA

Compute (Amsterdam HA)	99.95%	1 hour	3x credit
SAP Infrastructure	99.9%	1 hour	3x credit
Storage	99.99%	2 hours	2x credit
SkyBridge Connect	99.95%	30 minutes	5x credit
SkyKube	99.9%	1 hour	3x credit

Note: P1 response SLA of 1 hour is longer than competitors. Premium Support upgrade (€180,000/year additional) reduces P1 to 20 minutes.

6. Honest Risk Disclosure

- Primary EU hub is Amsterdam — Frankfurt is secondary with smaller capacity. Latency from Meridian Frankfurt HQ to primary region: 8ms
- TISAX not available — significant gap for Meridian automotive clients
- BSI C5 Frankfurt still in progress — cannot claim C5 compliance for Frankfurt workloads until December 2026
- SAP node specification (8TB RAM) may require upgrade within 3 years as Meridian scales — additional cost not in pricing
- P1 SLA is 1 hour — weakest in this evaluation for standard support
- Year 5 total cost (€7.3M) exceeds Meridian Year 1 ceiling — escalation concern for long-term budget planning
- Migration timeline (18-20 weeks) is longest in this evaluation
